Summary:

Pavtube iMedia Converter is the most advanced yet easy-to-use tool for backup and converting non-protected DVD and Video. It is capable of converting videos into various video and audio formats for backup on your hard drive; converting HD video clips from Cameras and Camcorders to common video and editable HD video formats for non-linear editing software; trans-coding common videos, DVR shows and flash videos into various popular video and audio formats for enjoying on popular devices like iPhone, iPad, Apple TV, Android tablets, etc; inserting into slideshows for presentation and uploading to the net for sharing. iMedia Converter provides perfect audio solutions. It is able to convert movies and MTVs with high quality audio up to 5.1 channels, extract audio from them, and convert to desired audio formats for enjoying with portable media players or making as ring tone for your iPhone. Its outstanding audio video sync technology makes perfect matching for converted files. Free you from the annoying out-of-sync problem. Easy to use but powerful editing facilities are equipped for you to crop out unwanted black edges, trim the video at any length, add text / image / video watermark, set special effects, eliminate the interlacing lines, adjust the volume, and replace the original audio track with favorable music. Great profile management enables you to create your own profile list. You can hide the rarely used formats simply with a few clicks and create new output formats based on existing formats and save them for future uses. Registered users are provided with prompt customer service and free updates for lifetime.
